15th International Symposium
on
Environmental Pollution
and its Impact on Life in the Mediterranean Region

October 7 to 11, 2009 in Bari, Italy

with focus on

Environmental Threats in the Mediterranean Region:
Problems and Solutions

organized by
Mediterranean Scientific Association
of Environmental Protection (MESAEP)

In Collaboration with

- University of Bari, Italy
- Politecnico di Torino, Italy
- Regione Puglia
- Agenzia Regionale per l'Ambiente Puglia (ARPA), Bari, Italy
- Istituto Agronomico Mediterraneo (IAM), Bari, Italy
- European Commission - Joint Research Centre, Ispra, Italy
- Helmholtz Zentrum München, Germany
- University of Ioannina, Greece
- Akdeniz University, Antalya, Turkey
- State General Laboratory, Min. of Health, Cyprus
- Bavarian Research Allianz, München, Germany
- SELECTO srl, Bari, Italy

OBJECTIVES

The objectives of the symposium are to offer opportunities for scientists of different countries to:

- exchange recent results related to environmental pollution processes and their effects on natural resources, public health and economy in the Mediterranean region
- discuss current scientific, technological and legal issues to avoid or reduce the degradation of the Mediterranean environment
- provide suggestions and recommendations to regulatory authorities on environmental quality and safety in the Mediterranean and other neighboring countries.

SYMPOSIUM LOCATION

The city of Bari is located in Southeastern Italy on the sunny and warm Adriatic coast, in the Region of Puglia of which is the regional capital. Bari counts around 400,000 inhabitants and is a very active commercial and touristic port featuring several daily ferry connections with Greece, Albania, Montenegro and Croatia.

The city features an old medieval area rich in renowned monuments, including the romanica Basilica of San Nicola and the Cathedral of the 10th-11th century, several other churches and buildings of various styles, narrow streets and small squares permeated by a suggestive ancient atmosphere, and several small restaurants, pubs and bars.

The active and crowded city centre surrounds the old city featuring long straight streets, several buildings of the 18th-19th century, including the central University building, the Ateneo, and elegant shops for all needs, restaurants of all types, pubs and bars. A typical feature of Bari is the impressive boulevard along the seashore (Lungomare), about 2-km long, with the old small harbor where still are small fishing boats.

The modern, wider city surrounds the city centre, and includes the scientific Campus of the University of Bari, buildings hosting several other University Faculties and Research Institutes, and the Polytechnic of Bari.

The beaches south and north of the city are renowned for their fine white sands often surrounded by pine woods and cliffs of calcareous rock.

The province of Bari and the region of Puglia offer a number of beautiful towns, both on the coast and on the hills, rich of culture, monuments and architectural features, and an agricultural land rich of centuries-old olive trees, vineyards and orchards.

The Symposium will take place at the Palace Hotel in the city centre.

ABOUT THE SYMPOSIUM

The 15th International Symposium on „Environmental Pollution and its Impact on Life in the Mediterranean Region“ is organized by the Mediterranean Scientific Association of Environmental Protection (MESAEP).

Since October 1979, MESAEP, a non-profit making association, has been contributing to the improvement of the Euro-Mediterranean cooperation on environmental issues. The scientific network of the association is already operational over the whole Mediterranean territory and has intensified collaborative efforts to control and preserve natural resources, protect environmental and human health, and combat pollution, erosion, and desertification in the Mediterranean region. More information on MESAEP activities can be found at the Internet address www.mesaep.org.

Previous symposia of MESAEP were held in Athens, Greece (1981), Crete, Greece (1983), Istanbul, Turkey (1985), Kavala, Greece (1987), Blanes, Spain (1989), Como, Italy (1991), Antibes, France (1993), Rhodos, Greece (1995), S. Agnello di Sorrento, Italy (1997), Alicante, Spain (1999), Limassol, Cyprus (2001), Antalya, Turkey (2003), Thessaloniki, Greece (2005) and Sevilla, Spain (2007).

PAPERS PUBLICATION

A book of abstracts will be distributed to all participants upon registration at the Symposium. All papers presented at the symposium will be eligible, upon refereeing, for publication in the peer-reviewed international journal FRESINIUS ENVIRONMENTAL BULLETIN (FEB), the official journal of MESAEP.

Authors are requested to submit manuscripts in electronic form and to send them directly as an e-mail attachment to PSP publishing: parlar@psp-parlar.de not later than December 19, 2009.

For the preparation of manuscripts please refer to www.psp-parlar.de

Supplementary information about the papers publication will be also given at the Symposium information desk in Bari.

STRUCTURE The program of the symposium will include plenary and keynote lectures, oral presentations as well as posters. Oral and poster contributions will be regarded as scientifically equivalent in the program.

Posters should be affixed in the evening of the day before or in the early morning of the day of the corresponding oral session, and removed in the evening of the presentation day. Selected poster authors will be invited to briefly present (3 min/3-4 slides) their poster content in full audience sessions scheduled.

All presentations (oral and posters) should be in English.

SESSIONS

The General Theme of the Conference is:

**“Environmental Threats in the Mediterranean Region:
Problems and Solutions”,**

This overarching theme will be discussed in n.11 sessions dealing with the following specific topics :

- Session 1. Agricultural, domestic and industrial wastes
- Session 2. Soil quality, pollution, degradation and desertification
- Session 3. Water quality and pollution
- Session 4. Outdoor and indoor air quality and pollution
- Session 5. Crops and food quality and pollution
- Session 6. Environment and human health
- Session 7. Animal health risks
- Session 8. Intercompartmental element fluxes and climate changes and effects on the ecosystem and human health
- Session 9. Biodiversity and sustainability
- Session 10. Sustainable mobility and renewable energy use to combat pollution
- Session 11. Natural and artificial radioactive pollution
